

As a consumer, I'd like to express our frustration at not being able to view certain programming that our local Cable provider (COMCAST) is able to "blackout" from our satellite provider. I believe this ruling will address this and will no longer allow what appears to be a monopoly on programming? If so, please expedite the ruling!!! We are currently in a "catch-22" situation, where we can't get Comcast to provide us with service for a reasonable connection charge and our satellite provider cannot air local sports programming. So we are completely blacked-out. Not fair!!! Please end this unfairness swiftly!
