In regards to: Creation of a Low Power FM Radio Service (MM Docket 99-25)
Amendment of Service and Eligibility Rules for FM Broadcast
Translator Stations (MB Docket 07-172, RM-11338)

REC Networks ("REC") has been made aware that a **Motion for Extension of Time** ("Motion") has been co-filed by the National Association of Broadcasters ("NAB") and Educational Media Foundation ("EMF"). This motion has already received the endorsement of various major players in this proceeding including Prometheus Radio Project and Radio Assist Ministries/Edgewater Broadcasting.

REC agrees with NAB and EMF that this proceeding has generated some technically extensive counterproposals by groups representing both translator and LPFM interests including the joint proposal by REC, Prometheus Radio Project and Common Frequency ("joint proposal").

REC feels that in order to assure a complete record and a full understanding of the joint proposal as well as the other proposals that have been advanced in this proceeding, we agree with NAB and EMF that an extension of time for one week will be in the public interest in this proceeding by allowing more time to review the extensive proposals and to accommodate those who are attending the NAB Radio Show in Chicago.

Therefore, REC Networks will go on record to state that we also **do not object** to this Motion.

Respectfully Submitted,

Michelle (Michi) Eyre
Founder, REC Networks
