II. E911 Phase II Location Technology Information

Pinpoint will deploy a UMTS system. Pinpoint intends to meet its Phase II E911 requirements utilizing a handset-based solution throughout its service area.

III. Testing and Verification

Pinpoint anticipates using a combination of Empirical Testing Methods and Predictive Testing Methods to gauge the accuracy of its ALI technology.

IV. Implementation Details and Schedule

To date, Pinpoint has not received any Phase II PSAP requests pursuant to Section 20.18 of the FCC's Rules. Upon receipt of such request, Pinpoint will develop its implementation schedule which will conclude no later than six months after receipt of such PSAP request.

V. PSAP Interface

When Pinpoint commences service, it will be operating with new hardware and software.

VI. Handset Information

100% of the handsets provided by Pinpoint will be ALI capable.
