**Re: WC Docket No. 09-197
Cellco Partnership d/b/a Verizon Wireless 2011 Eligible Telecommunications
Carrier Certification and Annual Report for the State of North Carolina
pursuant to 47 U.S.C. § 254(e), 47 C.F.R. §§ 54.313, 54.314, 54.202(a), and
54.209(b)**

Dear Ms. Dortch:

Cellco Partnership d/b/a Verizon Wireless ("Verizon Wireless") hereby submits the original and four (4) copies of the following information, which includes the annual certification required by 47 C.F.R. §§ 54.313 and 54.314, and the annual report required by the Commission's Report and Order issued March 17, 2005,¹ and 47 C.F.R. §§ 54.202 and 54.209:

- HIGH-COST CERTIFICATION PURSUANT TO 47 C.F.R. §§ 54.313 AND 54.314
- PUBLIC VERSION OF 2011 ELIGIBLE TELECOMMUNICATIONS CARRIER CERTIFICATION AND ANNUAL REPORT OF CELLCO PARTNERSHIP d/b/a VERIZON WIRELESS FOR THE STATE OF NORTH CAROLINA
 - Exhibit A – Designated Service Area for Study Area Code 239003
 - Public Version of Confidential Exhibits B-1 and B-2 – Progress Report on Service Improvement Plan
 - Public Version of Confidential Exhibit C – Coverage Map

¹ *In the Matter of Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, 20 FCC Rcd 6371 (2005).

I. INTRODUCTION

Pursuant to 47 C.F.R. § 54.209, Cellco Partnership d/b/a Verizon Wireless, on behalf of itself and its subsidiaries and affiliates providing commercial mobile radio service (“CMRS”) in the State of North Carolina (collectively, “Verizon Wireless” or “Company”), submits this 2011 Eligible Telecommunications Carrier (“ETC”) Certification and Annual Report and respectfully requests that the Commission certify its continued eligibility to receive high-cost support from the federal universal service fund (“USF”) during calendar year 2012.

II. CONFIDENTIALITY

The data in this report and the attached exhibits represent commercial and financial trade secrets regarding Verizon Wireless’ network build-out plans and other matters that are highly sensitive due to the competitive nature of the CMRS industry. Accordingly, Verizon Wireless respectfully requests that the Commission treat this data as confidential and withhold it from public inspection pursuant to 47 C.F.R. §§ 0.457(d)(1) and 0.459.

III. BACKGROUND

In 2004, the Commission initially designated Alltel Communications, LLC¹ (“Alltel”) as an ETC in certain non-rural telephone company wire centers pursuant to 47 U.S.C. § 214(e)(6).² The Commission subsequently approved the expansion of Alltel’s designated service area in 2008 to include certain rural telephone company study areas and individual wire centers.³

¹ Formerly named Alltel Communications, Inc.

² *In the Matter of Federal-State Joint Board on Universal Service, Alltel Communications, Inc. Petitions for Designation as an Eligible Telecommunications Carrier in Alabama, Florida, Georgia, North Carolina, and Virginia*, CC Docket 96-45, 19 FCC Rcd 20496 (WCB 2004).

³ *In the Matter of High-Cost Universal Service Support, Federal–State Joint Board on Universal Service, Alltel Communications, Inc., et al. Petitions for Designation as Eligible Telecommunications Carrier*, WC Docket No. 05-337, CC Docket 96-45, 23 FCC Rcd 8834 (2008).

**PUBLIC VERSION
CONFIDENTIAL VERSION FILED UNDER SEPARATE COVER**

A complete listing of the non-rural telephone company wire centers and rural telephone company study areas and wire centers in which Alltel was designated as an ETC by this Commission is attached as **Exhibit A** (“Designated Area”).

On January 9, 2009, Cellco Partnership d/b/a Verizon Wireless (“Cellco”) acquired Alltel Corporation and each of its subsidiaries and affiliates, including Alltel.⁴ In connection with the Commission’s approval of the Alltel Corporation acquisition, Verizon Wireless was required to divest assets and customers within certain markets, including markets in the State of North Carolina. Prior to closing on the sale of the assets and customers required to be divested, a Management Trustee was appointed to manage the divested markets, including markets in North Carolina.⁵ For administrative purposes, the Universal Service Administrative Company (“USAC”) also assigned the operations to be divested by Verizon Wireless study area code (“SAC”) 239001.

On May 28, 2010, the Commission approved a petition for *pro forma* amendment of the ETC designation held by Alltel and its affiliated legal entities in North Carolina to reflect Verizon Wireless as the designated entity.⁶ USAC has assigned Verizon Wireless SAC 239003 for its continuing operations in North Carolina.

⁴ See *In the Matter of Applications of Cellco Partnership d/b/a Verizon Wireless and Atlantis Holdings LLC for Consent to Transfer Control of Licenses, Authorizations and Spectrum Manager and De Facto Transfer Leasing Arrangements*, WT Docket No. 08-95, Memorandum Opinion and Order and Declaratory Ruling, 23 FCC Rcd 17444 (2008) (“*Merger Order*”).

⁵ *Merger Order*, ¶¶ 15, 19, 157-163, Appendix B.

⁶ *In the Matter of Federal-State Board on Universal Service, Cellco Partnership d/b/a Verizon Wireless, Petitions for Pro Forma Amendment of Eligible Telecommunications Carrier Designations in the Commonwealth of Virginia and the States of Alabama and North Carolina*, WC Docket 09-197, CC Docket 96-45, 25 FCC Rcd 5955 (WCB 2010) (“*Pro Forma Order*”).

**PUBLIC VERSION
CONFIDENTIAL VERSION FILED UNDER SEPARATE COVER**

Effective April 26, 2010, all of the assets and customers required to be divested in North Carolina were transferred from Verizon Wireless to Atlantic Tele-Network, Inc., and the term of the Management Trustee assigned to operate the divested assets was terminated with respect to the divested assets sold to Atlantic Tele-Network, Inc. Accordingly, Verizon Wireless does not seek certification to receive federal universal service support in 2012 under administrative SAC 239001.

IV. ANNUAL ETC REPORT IN ACCORDANCE WITH SECTION 54.209(a)

47 C.F.R. § 54.209(a) requires a common carrier previously designated by the Commission as an ETC to annually report certain information no later than October 1 of each calendar year. Verizon Wireless respectfully submits the following information for the period January 1, 2010 through December 31, 2010 in satisfaction of the Commission's annual reporting requirement.

A. Service Improvement Plan Project Report

47 C.F.R. § 54.209(a)(1) requires an ETC to file a progress report on its previously filed Service Improvement Plan. 47 C.F.R. § 54.209(a)(1) specifically requires:

A progress report on its five-year service quality improvement plan, including maps detailing its progress towards meeting its plan targets, an explanation of how much universal service support was received and how it was used to improve signal quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled. The information shall be submitted at the wire center level.

On October 1, 2010, Verizon Wireless submitted an updated Service Improvement Plan as **Confidential Exhibit D** to its 2010 Certification and Annual Report (the "Service Improvement Plan"). Verizon Wireless' progress report on the Service Improvement Plan for the period January 1, 2010 through December 31, 2010 is attached as **Confidential Exhibits B-1** and **B-2**. For purposes of this report, **Confidential Exhibit B-1** includes data associated with

PUBLIC VERSION
CONFIDENTIAL VERSION FILED UNDER SEPARATE COVER

SAC 239003 for the period January 1, 2010 through December 31, 2010, and **Confidential Exhibit B-2** contains data associated with administrative SAC 239001 for the period January 1, 2010 through April 25, 2010. The progress report also includes (1) a map attached as **Confidential Exhibit C** detailing the Company's progress toward meeting its plan targets in 2010,⁷ (2) an explanation of how much universal service support was received in 2010 and how the support was used to improve signal quality, coverage or capacity, and (3) an explanation regarding network improvement targets that were not met. The progress report is submitted on a wire center-by-wire center basis.

Additionally, Verizon Wireless has updated the remaining two years of the Service Improvement Plan as set forth in the attached **Confidential Exhibit D**. The update includes all of the information required by 47 C.F.R. § 54.209(a)(1) for calendar years 2011 through 2012.

In 2012, Verizon Wireless will continue to utilize federal high-cost universal service support for the provision, maintenance and upgrading of the facilities and services for which the support is intended consistent with 47 U.S.C. § 254(e) and 47 C.F.R. § 54.7.

The projected expenditures included in **Confidential Exhibit D** are based on the assumption that Verizon Wireless will receive the projected amount of federal high-cost universal service support identified on **Confidential Exhibit E**. The estimates of Verizon Wireless' future universal service support reflect the condition of the *Merger Order* requiring a phase-down of high-cost support in 20 percent increments over a period of five years following the closing.⁸

⁷ The cell site locations and signal coverage depicted on **Confidential Exhibit C** do not include facilities transferred to Atlantic Tele-Network, Inc. on April 26, 2010.

⁸ *Merger Order* ¶¶ 192-197; see also High-Cost Universal Service Support; Federal-State Joint Board on Universal Service; *Request for Review of Decision of Universal Service Administrator*

**PUBLIC VERSION
CONFIDENTIAL VERSION FILED UNDER SEPARATE COVER**

It is difficult, if not impossible, for Verizon Wireless to predict with any degree of certainty how much federal high-cost universal service support the Company may receive. There are various factors that affect the total amount of support Verizon Wireless can be expected to receive, including but not limited to, the per line support that is available to incumbent telephone companies, federal policy changes, USAC reconciliations, and other factors beyond Verizon Wireless' control. If actual receipts differ from those assumed in this report, Verizon Wireless reserves the right to modify its projected capital and operating expenditures for the Designated Area.

B. Network Outages

47 C.F.R. § 54.209(a)(2) requires an ETC to report annually network outages within its ETC designated area. 47 C.F.R. § 54.209(a)(2) specifically requires:

[d]etailed information on any outage, as that term is defined in 47 C.F.R. 4.5, of at least 30 minutes in duration for each service area in which an eligible telecommunications carrier is designated for any facilities it owns, operates, leases, or otherwise utilizes that potentially affect (i) [a]t least ten percent of the end users served in a designated service area; or (ii) [a] 911 special facility, as defined in 47 C.F.R. 4.5(e). Specifically, the eligible telecommunications carrier's annual report must include information detailing: (A) [t]he date and time of onset of the outage; (B) [a] brief description of the outage and its resolution; (C) [t]he particular services affected; (D) [t]he geographic areas affected by the outage; (E) [s]teps taken to prevent a similar situation in the future; and (F) [t]he number of customers affected.

The required information for the time period January 1, 2010 through December 31, 2010 is contained within **Confidential Exhibit F-1** and **Exhibit F-2**. Verizon Wireless has compiled and reported information for all outages that meet the above criteria within the Designated Area in North Carolina for the aforementioned time period. For purposes of this report, **Confidential Exhibit F-1** includes data associated with SAC 239003 for the period January 1, 2010 through

by Corr Wireless Communications, LLC, WC Docket No. 05-337, CC Docket No. 96-45, Order and Notice of Proposed Rulemaking, FCC 10-155, ¶¶ 14-17 (2010).

PUBLIC VERSION
CONFIDENTIAL VERSION FILED UNDER SEPARATE COVER

December 31, 2010, and **Exhibit F-2** contains data associated with administrative SAC 239001 for the period January 1, 2010 through April 25, 2010. Such information includes any outage of at least 30 minutes in duration that potentially affected at least ten percent (10%) of its customers served in a service area or a 911 facility. The services affected by an outage were dependent upon the capabilities of the particular facility affected by the outage. Generally, a cell site or switch outage will affect all services provided by the cell site or switch, including voice, data and/or 911 services. The information relating to the number of customers affected by an outage is estimated based on the number of customers with a billing address in each affected wire center.

The steps taken to prevent a similar outage in the future will vary based on a determination of the cause of the outage. Each network outage is examined on a case-by-case basis. For example, when the outage is due to equipment failure, the equipment is replaced or repaired and tested for proper performance, including preventive maintenance. Additionally, the manufacturer or vendor is notified if the failure appears to be in the design or manufacture of the equipment. If the vendor or manufacturer fails or refuses to remedy the deficiency then a replacement source is determined. Similarly, when the outage is due to weather or other natural occurrence, the probability of a repeat occurrence is considered and evaluated in planning the repair, replacement or rebuild of the equipment or location. Outages due to human error or a faulty process or practice will result in an appropriate reevaluation of the source of error and the need to correct, discipline or replace the person or practice, as applicable. An outage on a leased facility or circuit is escalated and corrected by the third-party facility provider. The outages reported on **Confidential Exhibit F-1** and **Exhibit F-2** were not determined to require extraordinary measures other than application of the above procedures.

C. Unfulfilled Requests For Service

47 C.F.R. § 54.209(a)(3) requires an ETC to annually report annually the number of requests for service from potential customers within the ETC's designated area that were unfulfilled during the past year. The filing must also detail how the ETC attempted to provide service to those potential customers as set forth in Section 54.202(a)(1)(i). The required information concerning unfulfilled requests for service within the Designated Area in North Carolina from January 1, 2010 through December 31, 2010 is contained in **Confidential Exhibit G-1** and **Exhibit G-2**. **Confidential Exhibit G-1** includes data associated with SAC 239003 for the period January 1, 2010 through December 31, 2010, and **Exhibit G-2** contains data associated with administrative SAC 239001 for the period January 1, 2010 through April 25, 2010.

D. Complaints Per 1,000 Handsets or Lines

47 C.F.R. § 54.209(a)(4) requires an ETC to report annually the number of complaints⁹ it receives per 1,000 handsets or lines. Verizon Wireless received 0.47 complaints per 1,000 handsets associated with SAC 239003 between January 1, 2010 and December 31, 2010, and 0.20 complaints per 1,000 handsets associated with administrative SAC 239001 between January 1, 2010 and April 25, 2010.

E. Certification Regarding Applicable Service Quality Standards And Consumer Protection Rules

47 C.F.R. § 54.209(a)(5) requires an ETC to certify that it is complying with applicable service quality standards and consumer protection rules. Verizon Wireless' compliance with the

⁹ Complaints consist of written customer complaints from its customers submitted to the Commission, the North Carolina Utilities Commission, the North Carolina Attorney General, the Better Business Bureau or similar third party agencies and oral, written, and e-mail customer complaints submitted to the Company's Executive Complaint Department.

**PUBLIC VERSION
CONFIDENTIAL VERSION FILED UNDER SEPARATE COVER**

CTIA Consumer Code for Wireless Service (“CTIA Consumer Code”) satisfies this requirement. Verizon Wireless certifies that it has complied and will continue to comply with the principles set forth in the CTIA Consumer Code.

F. Certification Regarding Ability to Function in Emergency Situations

47 C.F.R. § 54.209(a)(6) requires an ETC to certify that it is able to function in emergency situations as set forth in Section 54.202(a)(2). The following information demonstrates an ability to remain functional in emergency situations in satisfaction of this requirement.

Each cell site is equipped with battery standby power engineered to maintain a standard of eight hours backup with a two-hour minimum standard when restricted by site location. Each cell site, unless restricted by site location, also has a permanent standby generator on site, or has the necessary equipment to allow a portable generator to be quickly and safely connected to the site in the event of a commercial power failure. Portable generators are available for transport to an area affected by a commercial power outage. Backup generators are tested on a regular basis to assure functionality. Thus back-up power systems and procedures have been implemented to ensure functionality without an external power source.

In the event of damaged facilities, telecommunications traffic may be rerouted on the network to minimize service disruptions. The network design philosophy also includes redundancy on critical paths and components so that a potential failure of one component does not significantly affect service. The wireless voice and data switching networks are designed to provide continuous service to the customer. The communications between internal switches and external networks, such as the public switched telephone network (“PSTN”) and the Internet, are also designed to reduce the possibility of interrupted communications.

**PUBLIC VERSION
CONFIDENTIAL VERSION FILED UNDER SEPARATE COVER**

The network is comprised of numerous components that are connected using a combination of traditional landline telecommunication networks and microwave radio links. Many of the network's critical locations are supported with diverse circuits, network technologies, and alternative local telecommunications carriers. The impact of a severed fiber optic cable or a faulty T1 circuit is minimized by this diversity in telecommunications connectivity.

Business procedures have also been adopted to assure minimal service disruptions. These procedures include frequent and thorough preventive maintenance, real-time monitoring of all key system components, the availability of trained maintenance personnel 24 hours a day, 7 days a week to repair or resolve critical failures should they arise, and wide deployment of these personnel and spare parts to permit rapid response and restoration of service.

The network is also designed to manage traffic spikes and minimize call blocking in emergency situations. In order for a traffic spike to result in call blocking, the number of simultaneous calls must exceed the total number of voice paths available at one or more serving cell sites at a given location. Statistical analyses are used to track call blockage in each sector during the busiest hours each month. These statistics are trended and used to predict the required capacity at each cell site. Based on these predictions, capacity is added to each cell site before it reaches overcapacity. In the event unpredictable spikes occur, steps can be taken to increase the call capacity at cell sites as needed, or to deploy temporary "Cells On Wheels" ("COWs") as needed to accommodate the increased demand on the network. These capabilities and systems reasonably minimize call blocking from potential traffic spikes during emergency situations. Verizon Wireless therefore certifies the ability to function in emergency situations as set forth in Section 54.202(a)(2).

**PUBLIC VERSION
CONFIDENTIAL VERSION FILED UNDER SEPARATE COVER**

G. Certification Regarding Provision Of A Comparable Local Usage Plan

47 C.F.R. § 54.209(a)(7) requires an ETC to certify it is offering a local usage plan comparable to that offered by the incumbent LEC in the relevant service areas. All of Verizon Wireless' generally available voice service offerings are comparable to the local service offerings provided by the incumbent LECs serving the Designated Area. Verizon Wireless' service offerings include varying amounts of local usage within an expansive local calling area, including plans with unlimited calling. Verizon Wireless also offers multiple service plans, which enables customers to select a plan that best meets their needs based on the amount of local calling included in each plan. Information concerning Verizon Wireless' currently available service offerings is available at www.verizonwireless.com. Verizon Wireless certifies it offers and will continue to offer at least one comparable local usage plan within the Designated Area as required by Section 54.209(a)(7).

H. Certification Regarding Equal Access

In compliance with 47 C.F.R. § 54.209(a)(8), Verizon Wireless certifies that the Commission, pursuant to 47 U.S.C. § 332(c)(8), may require the Company to provide equal access to long distance carriers in the event that no other ETC is providing equal access within the Designated Area.

CONCLUSION

Based on the foregoing information, and in accordance with 47 C.F.R. §§ 54.313 and 54.314, Verizon Wireless respectfully requests that the Commission certify its eligibility to continue receiving federal high-cost universal service support during calendar year 2012.
