**MSS 911 EMERGENCY CALL CENTER ANNUAL POST-IMPLEMENTATION STATUS
REPORT OF STRATOS MOBILE NETWORKS, INC. AND STRATOS COMMUNICATIONS,
INC.
(October 2010 – September 2011)**

As required by the Commission's Rules, Stratos Mobile Networks, Inc. and Stratos Communications, Inc. and their affiliates (collectively "Stratos") are pleased to present this MSS 911 post implementation status report.

Stratos is a company specializing in mobile and fixed remote communications solutions for government, enterprise and individual customers operating beyond the reach of traditional terrestrial telecommunications. The company is a vertically integrated satellite and microwave global service provider that owns and operates its own telecommunications facilities, shares infrastructure with other carriers, and distributes the services of other network operators.

Stratos' portfolio of mobile satellite services includes Inmarsat, MarineSat/LandSat MSV and Iridium.

Stratos offers MSS 911 capability to those specific services and terminals that are subject to the MSS 911 requirements and for which Stratos is the facilities based carrier.

The distribution of Stratos services is through 300+ authorized distributors around the world. In addition, Stratos maintains a direct sales force which focuses on larger accounts requiring a solution sale, including VSAT (very small aperture terminals) data network services, government contracts and turnkey oil and gas projects.

The markets that Stratos serves include Oil and Gas, Government/Military, Shipping, Commercial Fishing, Broadcast/ Media, Aeronautical, Energy, Mining, Cruise, Engineering/ Consulting, Yachting, Rural Communications, Humanitarian/ Disaster Relief, Resource Exploration, and Recreational Users.

Stratos' Identification Information:

Corporate Headquarters:
Stratos Global Corporation
6550 Rock Spring Drive, Suite 650
Bethesda, MD 20817
(301) 214-8800

Location of MSS 911 Customer Call Center:

Stratos Global Corporation
34 Glencoe Drive
St. John's, Newfoundland, Canada
A1C 5X3

Tracking of MSS 911 Calls:

Stratos operates a centralized support call center in St. John's, Newfoundland, Canada that is staffed 24 hours a day, seven days a week. Calls into the support center, including MSS 911 calls are processed by a Nortel Contact Center call management system. Calls are separately classified into skill set queues and routed to appropriate operators based upon the destination number dialed and presented to operators along with queue details. The monitoring system recorded calls that were successfully answered along with abandoned calls. For the purposes of reporting, a call must be active for at least 20 seconds before being considered abandoned. This system is used to produce daily reports of all call activity into the support center on a per queue basis.

Stratos also operates a customer relationship management ("CRM") system to log all incoming support calls. Stratos has developed a support procedure for MSS 911 calls that includes identification of the appropriate PSAP by using commercially available software (PSAP Pro from Mapinfo) after determining

the geographic location of the caller and the nature of the emergency. The details of the MSS 911 call caller information, date and time of call and the PSAP to which the call was routed are recorded in the CRM system. That information was used to compile this report.

Details of these call statistics are summarized below for the reporting period of October 1, 2010 through September 30, 2011.

Summary of Call Statistics by Month

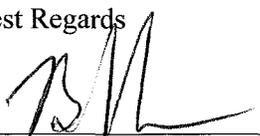

| Month | Total Calls Received | Total Calls Abandoned | Total Calls Requiring Forwarding to PSAP | Total Calls Not Requiring Forwarding to PSAP |
|----------------|----------------------|-----------------------|--|--|
| October 2010 | 0 | 0 | 0 | 0 |
| November 2010 | 1 | 0 | 0 | 1 |
| December 2010 | 1 | 0 | 0 | 1 |
| January 2011 | 0 | 0 | 0 | 0 |
| February 2011 | 2 | 0 | 0 | 2 |
| March 2011 | 2 | 0 | 0 | 2 |
| April 2011 | 0 | 0 | 0 | 0 |
| May 2011 | 1 | 0 | 0 | 1 |
| June 2011 | 2 | 0 | 0 | 2 |
| July 2011 | 1 | 0 | 0 | 1 |
| August 2011 | 7 | 0 | 0 | 7 |
| September 2011 | 4 | 0 | 0 | 4 |

Conclusion

The call volume received by Stratos for the MSS 911 Service has been small and none of the calls resulted in an emergency situation that required forwarding to a PSAP.

Any questions related to this report should be directed to the undersigned at the contact details provided earlier.

Best Regards

Bruce A. Henoch
