WIRELESS TELECOMMUNICATIONS BUREAU EXTENDS DATE TO COMMENT ON DRAFT PROGRAMMATIC ENVIRONMENTAL ASSESSMENT OF THE ANTENNA STRUCTURE REGISTRATION PROGRAM

WT Docket No. 08-61
WT Docket No. 03-187

Comment Date: November 2, 2011

On August 26, 2011, the Wireless Telecommunications Bureau (Bureau) released a draft Programmatic Environmental Assessment (PEA) of its Antenna Structure Registration (ASR) program.¹ At that time, the Bureau set the comment due date for October 3, 2011. On September 26, 2011, the United States Department of the Interior (DOI) filed a request that the Bureau extend the comment period by 30 days, and indicated that such relief was appropriate “[g]iven the need for a comprehensive analysis of the ASR program, the need for a comprehensive approach to avoiding or minimizing hazards to migratory birds from the program, and corrections to the analysis conducted to date.”² On the same date, the American Bird Conservancy, Defenders of Wildlife, and National Audubon Society (Conservation Groups) requested an extension of “at least 30 days, preferably 45 days,” primarily so that a study by Travis Longcore *et al.* on the effects of communications towers on migratory birds at the species level can complete peer review and be considered by the parties and the Commission.³

For the reasons provided in the DOI request, and recognizing the complexity of the subject matter and the large volume of research and analysis presented in the draft PEA, the Bureau grants an extension of 30 days, until November 2, 2011. This extension will allow all parties, including the federal agency with expertise on migratory birds, to provide comments reflecting a fully considered analysis. The extension will also enable parties including the Conservation Groups to incorporate the analysis of additional experts into their comments.⁴ In the event significant new information becomes available after November 2, parties may timely supplement their comments.
