

I am a person with a hearing loss who depends on captioning on television and over the Internet. I support the comments filed by TDI, NAD, HLAA and other consumer groups.

I also urge rapid activation of these guidelines as this area of "broadcasting" is on the cusp of becoming a widespread, de facto means of providing video content.

Finally, I would like to compliment companies such as Netflix, Hulu, CBS, FOX, ABC and others who have already begun providing captioned content and would like to scold Amazon which has declined to provide any captioning other than a few subtitled foreign films.
