

It has been reported recently on the newsmax web page that your organization along with our president will take over control of the u.s. internet on 20 NOV. 2011. If this is true there will be civil uprising in this country. Let me remind you that there is enough military knowledge on the streets of this nation to make for a very unpleasant situation for your org. and many others should you and that idiot try this takeover. As a 42 month combat veteran of vietnam i suggest that you give this communist thought a lot of very careful consideration before acting on it. Taking over the internet from a "FREE" nation is a blatant act of treason and communism and goes against our constitutional rights. The oath to uphold and defend this paper against all enemies foreign and domestic will be implemented. your call.
