

We need common carrier Title II rules of Network Neutrality applied to all ISPs especially those who will benefit at all from USF Reform and the Connect America Fund to ensure the open internet remains a neutral, open, participatory platform and despite how much the telecom lobby hates Network Neutrality because it makes the ISPs into dumb pipes that is what we need to protect and maintain. Such Net Neutrality rules should apply equally to wireless services. Most important though we need competition mandates. AT&T by the way whose T-Mobil merger has rightly been denied by the F.C.C. and Justice opposes Network Neutrality rules. We need to stop their power grab. Economic extortion by AT&T, Verizon Communications, Comcast, Time Warner Cable, CenturyLink, Windstream etc is unacceptable.
