

The No. 2 and No. 4 wireless carriers announce a \$39 billion merger deal that would create a company with nearly 130 million subscribers, easily leapfrogging Verizon Wireless for the No. 1 spot.

None of the facts though support AT&T's claims of the merger's supposed benefits. None of AT&T's corporate propaganda or corporate shills are able to explain away the facts despite all their arguments for the disastrous merger. Once again I applaud the Justice Department and FCC for blocking this merger.
