

The Bush Administration's FCC gave away the Internet our tax dollars paid for to greedy Monopolies - without the permission of Congress. What Bush's FCC stole from the American People, Obama's FCC can take back for us:

**PUT THE INTERNET BACK UNDER TITLE II WHERE IT BELONGS!**

-The Internet was born under Net Neutrality and is nothing without it!

The FCC should also extend Net Neutrality to wireless! Otherwise an unequal two-tiered Internet could develop a story of 2 Internet(s) 1 that is wired (fixed wire-line) yet open and participatory and a wireless web though that is closed and proprietary. It doesn't matter how we access the Internet our access we should have open and universal access.
