

If AT&T's transaction for unused Qualcomm wireless spectrum is approved AT&T should be required as proposed by smaller 700 MHz A Block licensees to require all of AT&T's 700 MHz LTE devices to work across all Lower 700 MHz spectrum -- not just the Band Class that AT&T currently is assigned -- within two years. This reasonable request by smaller wireless licensees should be made FCC policy on this transaction. Please implement and enforce this policy on AT&T should they be allowed to acquire Qualcomm's unused wireless spectrum to help foster more interoperability between affected wireless carriers and their networks.
