Re: Routing of E911 Calls from Resold Wireless Services

Carrier provides licensed facilities-based wireless services directly to all of its customers and routes 911 calls from such customers to the Public Safety Answering Points (PSAPs) in accordance with applicable Federal Communications Commission ("FCC") enhanced 911 ("E911") legal requirements and pursuant to arrangements with PSAPs to receive such calls.¹

Carrier provides wholesale wireless service to TracFone Wireless, Inc. (TracFone), which resells such service to customers under its own brand on a prepaid basis.

As a wholesale customer of Carrier, TracFone has asked Carrier to certify that TracFone's Lifeline customers will have access to 911 and E911. In this regard, Carrier certifies that Carrier routes 911 calls according to applicable FCC E911 requirements and that it routes 911 calls from TracFone customers to PSAPs in the same manner as Carrier routes 911 calls from its own customers to PSAPs.

Carrier has engaged in 911 testing with PSAPs to confirm 911 and E911 access in accordance with applicable FCC requirements. Thus, as a resale customer of Carrier, TracFone customers have the same access to 911 and E911 as do Carrier's own customers.
