

I went to my local ABC TV web site and found a message to viewers that Verizon Fios subscribers is not negotiating with them to provide their channel - <http://www.9wsyr.com/default.aspx>. This is wrong. If you subscribe, and in many cases are locked in, to a specific cable provider then they should be forced to carry the local affiliates - no questions. Since the switch to digital it is almost impossible to consistently get local channels over the airways. I have line of sight for three out of four and I need to constantly adjust the antenna. This is so 1960's. Please force the TV providers, that lock consumers into contracts, to provide the channels that we agreed to when we signed up.
