

Here are some notes from when tried to order pizza from Papa Johns on the 13th of this month from my room. Ordering the food took almost three hours. I called PapaJohns at 256-7272 (this is supposed to be the number for a store on Gibson (according to the phone book)). The woman said that the Papa Johns at Yale and Central is the one that would deliver to my room and there number is 255-7272. I called 255-7272 and a woman answered and said that her name is Jenelle. When I tried to dial 9 on the land line phone I got a busy signal (that sounded much like an English Ambulance (minor thirds). I called the front desk from the land line phone and Maria answered and I ask her why I can not dial out from the phone in the room. She said to try in another five minutes and if it doesn't work to give her a call back. I talked to call taker 4525 from APD and told her that I can not dial out from the phone in the room and that when I called the front desk and talked to the woman at the front desk that she said that I should try to call again in five minutes and if it doesn't work to give her a call back. The call taker asked if I gave her a call back and I told her no. I ask if she could hold on while I give the person a call back. I called down to the front desk (from the land line phone in the room) and a woman that said that her name was Denise answered. I ask if Maria was there and "Denise" said that she wasn't and said "is your phone still not working?". She told me to hold on. (The time was approximately 6:37 (according to my watch). I tried to log on to the WiFi from the Dell computer and was unable to (a red rectangle appeared and said this frame was blocked and for any internet service questions call 1-877-275-9444. I called APD and talked to operator #3971 and told her of my call with the previous operator #4525 and told her that I talked with "Maria" before talking to Denise and that Denise said that Maria wasn't there. I looked in the business white pages for Jimmy Johns and the phone number was not listed. I called down to the front desk and "Mary" answered and said to try again. In the phone conversation she said "I just opened up your phone lines". I couldn't find my cell phone and used a different cell phone and tried to explain that I had called and the call taker (#3179) interrupted me and said this is for life and death

emergencies and that if you don't have an emergency I am going to disconnect. When I walked inside the handle to the door was lying on the ground near the corner of the table and the cell phone that I had reported missing was on my computer (it was camouflaged (sp?) by the computer of the same color) I tried to dial out on the land line phone again and got a busy signal with the same "English Ambulance" sound. I received a call from the front desk and the woman on the land line phone said "your name came up" and you can try again. I dialed the number for APD from the cell phone that I had reported missing and the call did not go through. I called the Kansas City police and call taker 30 said it doesn't sound like an emergency and I am going to disconnect. I called 255-7272 from the land line phone and the man said that his name is Josh answered the phone and said that they are right next to the McDonalds when I ask where they are located and that they are on the east side of Yale. I called Jimmy Johns from my cell phone that I had reported missing at the number provided by the person at the front desk and he said that we don't go that far south. I called 256-7272 and the woman said that would be our Yale location. The man on the phone said that he is located on Central at 2301? The order for the works will cost \$17.11 and will take about 40 to 45 minutes (8:19). I told him that I will pay cash. The order arrived (probably earlier).
