Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

First, I want to say there is something very wrong with a system that allows "a few bureaucrats", who apparently know very little about the GPS industry to have the power and authority to allow something like what LightSquared is requesting to proceed when in fact it will have a negative impact on literally millions of people. Putting their jobs, their way of life, their safety in jeopardy. No small group of appointed people should have that kind of power.

Second, I want to make it clear that LightSquared should not be allowed to go forward until it has shown that their plan will not interfere with my or anyone else's high-precision GPS equipment. I have a huge investment in our GPS equipment and with the slow economy there is no budget for replacement or modification. If LightSquared has their way I might as well close the doors and put seven more people on unemployment. Not only the surveying industry will be harmed, but so will the hundreds of thousands of people who use the data we produce and that is only in the surveying industry. As a user of high-precision GPS, I **strongly oppose** LightSquared's request, (which, by the way, ignores all of the recent independent test results), to affirm its license and its request to go forward with its plan".

Respectfully,

Donald L. Plumb
