

Dear Commissioners,

My name is Mark Uhde and I live in Kalispell, Montana. I write to you respectfully requesting that you DENY the proposed transaction. I understand the nature of it, and that it is a penalty for the merger falling through. Regardless, I do not believe that T-Mobile USA should be allowed to obtain any further spectrum assets until they fulfill the spirit of the build-out requirements by offering service to a majority of the population in all of their licensed areas. As it is, they own licenses both in PCS and AWS bands, the PCS ones relatively old, in my county (Flathead) and throughout Montana. Yet, they do not actually offer any service, nor have they built a functional network for their customers here using those licenses, especially the PCS ones which have build out requirements for the county that they are violating the spirit of.

In summary, T-Mobile USA should be prohibited from acquiring any further spectrum, even in this situation, until they finish completing the spirit of the requirements for network build in markets such as Flathead County, MT and other areas.

Sincerely,

Mark Uhde
