RE: *In the Matter of Facilitating the Deployment of Text-to-911 and Other Next Generation 911 Applications, PS Docket No. 11-153; Framework for Next Generation 911 Deployment, PS Docket No. 10-255*

Dear Ms. Dortch:

On February 2, 2012, the undersigned and John Snapp, Intrado Senior Technical Officer, met with David Furth, Patrick Donovan, Sean Lev, David Siehl, Jerome Stanshine, John Healy, Henning Schulzrinne and Erika Olsen of the Public Safety and Homeland Security Bureau and Cheryl King of the Consumer and Government Affairs Bureau.

During the meeting, the attendees discussed issues set forth in the attached presentation,¹ including:

- 1) Intrado's vision as to how text-to-911 can be deployed, in particular when elements of the deployment are established and how they function in each stage;
- 2) That a direct text-to-911 deployment does not require the development of additional standards, explaining that standards applicable to the wireless carriers' networks already exist and standards that apply to PSAP networks are encompassed within i3 development;
- 3) Comparison of potential SMS, TTY and Text-to-Speech deployments; and
- 4) Elements of costs associated with direct SMS text-to-911 and SMS to a 911 text relay center.

¹ The attached has been edited from the presentation provided during the meeting:

- to correct typographical errors,
- provide a glossary of terms,
- to amend the diagrams on pages 5, 7, 9 and 11 to show the image labeled as the "TPC" as "IMLC", to show the image depicted as the "TSR" as including the "TSR" and "TPC", and
- to delete the phrase "Text Selective Router" as a bullet under the heading "Wireless Carrier Functional Elements" on page 17 and add "IMLC" under the same heading.

Please do not hesitate to contact me if you have further questions.

Sincerely,

/s/

Lynn A. Stang
