

I do not like the blackouts... Heck I own several season tickets to the San Diego Chargers and cannot always make the games, then I cannot see them if they are BO...

there is a monopoly on the Pay Per View - only direct tv shows them with a huge YEARLY SUBSCRIPTION...

Look, an easy way to solve all of this is what I have been saying for a long time - let people order the game on PPV as an option, if they have a blackout, then sell the game on PPV for those that still would wish to order it...Both teams will have an added revenue stream to split, and that is what its all about correct?

I would wish I could order the games I want and not be locked into a Yearly Subscription and then a Yearly satellite TV rate as a requirement for years as well, that's bad...

what I mean by that is, the programming in an area sometimes shows the worst games i could care less about, let me watch the teams I want to see besides the ones being broadcast, and or the ones blacked out on a PPV basis... you could tax them as well, its all about revenue right?
