

This is an absolute no brainer. I don't know how this has gone on for so long.

Gps is at the heart of our daily lives. The military depends on it. Civil aviation depends on it. And how would we get from A to B without it.

My office launched the first Tyros Satellite in the mid 60's from Vandenberg AFB Don't et these people screw up a system that works so well.

Martin Sobel, Captain TWA (Ret), FAAFast Team Lead Representative SRQ
