

GPS has literally saved my life. Transiting the NJ shore in my 25' power boat I encountered an unpredicted powerful afternoon thunderstorm that knocked visibility down to a short distance and kicked up steep waves that threatened to overturn my boat. Heading into the wind was the only option and my GPS enabled me to enter the Atlantic City breakwater and escape the storm. Without my GPS, I might not be here to write this request. Please don't harm GPS transmissions. Thank you.
