

I totally support the FCC's initial recommendation to withdraw Light Squared's Broadband Application Approval.

I currently hold a 100Ton USCG Masters License and spend approximately 75-90 days a year on the coast of Maine. I also teach a navigation course for Yarmouth community Services.

I use GPS on a daily basis for most of the summer, regularly in my car as well in other avocations such as hiking, skiing, hunting, snowshoing, etc.

Any risk to the integrity of GPS signals would seriously endanger many lives and property as well as the impact on our military.

Thank you for your consideration of these comments.
