

To whom it may concern:

My line of business is Market Research. Because of the nature of my job I use GPS extensively to not just find routes and information about places but also to do preliminary exploration and collection of data. GPS is vital to my being competitive and also to have data that is totally reliable. My livelihood depends on the accuracy of GPS.

Until such time that technology is available which would not interfere with the reliability of GPS I urge you to stop issuing permits to any company which might jeopardize the integrity of GPS.

I use GPS on the land and in the water and cannot afford to have false data.

Thank you kindly.

Harry Vardis
