

I use the GPS every day on the water, in my car, in my truck, in the RV, and in the air plane.

If GPS became unavailable or unreliable it would really make life a whole lot more difficult. I use it to navigate where ever I travel.

Wireless broadband service is important, but it should not come at the expense of GPS.

All the studies show that LightSquared's proposed network would cause interference and that there are no remedies.

I rely on the FCC to protect the integrity of the GPS signal and I support the FCC recommendation to stop LightSquared's current proposal
