

WOW! why do you what to ruin a good thing. We use our GPS for everything. From Fishing 60 miles out in the ocean to driving down the road. This is a safety issue. We depend on our GPS everyday. Alot of family use it to keep track of their children. If you get lost its there on your phone, in your car, and on your boat. Please do not interfere with our GPS systems. We need it for our everyday life. I know that in the past people who have been lost in the woods or lost on the roads have depended on their GPS to help find their way out. We used it during hunting season when we went in the woods to track a deer and we got lost and couldnt find our way out. We turned to our phones and use the GPS to get out. DONT TAKE OUR GPS AWAY!
