

To FCC:

I rely on you to protect the integrity of the GPS signal and I support your recommendation to stop Lightsquareds current proposal. It is my understanding that the lower 10 are not as perilous as the upper 10. As a marine user as well as dealing with aviation gps I can't fathom the problems encountered in sea rescues relying on gps and its unfailing capabilities. Interference of any kind would be perilous to rescue efforts alone.

Again, I support your recommendation to stop Lightsquareds current proposal.

Respectfully submitted:
