

GPS is critical to our life these days. As a sailor, it is more crucial than even land use. All the studies show that LightSquared's proposed network would cause interference and that there are no remedies. We rely on the FCC to protect the integrity of the GPS signal. LightSquared's current proposal is not critical for anyone at present. The company will benefit, as will shareholders, but the public at large will be harmed by the interference with GPS. Moreover, there is certainly no shortage of broadband at present. Please do not pass this proposal.
