

I am an avid boater and outdoors man in addition I am a project manager for a construction company.

The loss of GPS in my daily life will be a huge impact!

1. I fish regularly in the summer time and use GPS as my sole source of navigation. If GPS goes out when I am on the water it will be very dangerous.

2. I use GPS when hunting and trapping in the woods. I use GPS as my sole navigation source. This would also be very dangerous if I am in the woods and lose GPS signal.

3. I believe that wireless broadband is important but not at the cost of our GPS system. The LightSquared proposal will seriously compromise our GPS system with no proposed correction.

4. We the American public that rely on the GPS system count on the FCC to protect our systems from this kind of thing. We depend on these signals every day for our well being and my family trusts when I go out that I will come home.

Thanks for your help with protecting all of us and our GPS system!
