

Wireless broadband service is important, but it should not come at the expense of GPS.

All the studies show that LightSquareds proposed network would cause interference and that there are no remedies.

With that in mind, we implore the FCC to scrap LightSquareds proposal.

Boaters and drivers rely on GPS to guide us safely to our destinations. We rely on the FCC to protect the integrity of the GPS signal.

We support the FCC recommendation to stop LightSquareds current proposal. Thank you.
