

I rely on GPS for boating, hunting and directions when visiting customers for my business. GPS has become an essential part of my operations.

If GPS become unavailable or unreliable it will have economic impacts on my business and put my life at risk when boating and hunting.

I rely on broadband phone too but it should not come at the expense of GPS.

All the studies show that LightSquared's proposed network would cause interference and that there are no remedies.

Of course I understand that the CEO is a big Obama contributor

but that doesn't justify changing the recommendation to stop LightSquared's current proposal.
