

Please protect the GPS signal by saying "No" to LightSquared's current proposal. I use GPS both on my boat and in my car. Unreliable GPS signals will be a major inconvenience in my car, and downright dangerous on my boat.

I understand that wireless broadband service is important, but it should not come at the expense of GPS. All the studies show that LightSquared's proposed network would cause interference and that there are no remedies.

I rely on you, the FCC, to protect the integrity of the GPS signal and that I support their recommendation to stop LightSquared's current proposal.

Thank you.
