

Yes, I strongly agree with Reimbursement Compensation Model on "Pre-Minute Basis" because I do not want to stay with only one provider for 1 or 2 years. That VRS program is very important for all of us as deaf people because of vocabulary and sentence. It really is much more easily for me to understand when VRS interpreters signed than any kind of TTY. At Most I don't understand to read what any TTY says. VRS is the best for me as more understandable. I am thankful for that VRS. I wish to have it years ago.
