

I use GPS for boat and auto navigation. If GPS became unavailable, I would become lost enroute or possibly have an accident due to not knowing my location. Wireless broadband service is important, but it should not come at the expense of GPS. All the studies show that LightSquared's proposed network would cause interference and that there are no remedies. I am relying on you, the FCC, to protect the integrity of the GPS signal. I support the FCC's recommendation to stop LightSquared's current proposal.

Thank you.
