

My Personal Use of GPS: As a licensed United States Coast Guard Captain of Uninspected Passenger Vessel (OUPV) (Reference Number 2874188), with the responsibility of assuring and maintaining the safety of all persons on board, I urge you to protect the integrity of the GPS signals and urge you to stop LightSquared's current proposal. While underway, I rely heavily upon my GPS to verify course heading, location, and that I am navigating in safe waters. The remotest possibility of degradation of the current GPS system at the risk of jeopardizing the safety and lives of persons on board would be totally unacceptable. I ask that the FCC please give careful consideration to all comments received in making your decision. Thank You.
