

A year ago I filed an application with CDS (deaf org.) that helps distribute personal computer, VRs, high speed internet, etc a year ago and they are not helping me at all.

There is a problem with certificated interpreter while using VRS - mostly it are related to regional American Sign Language - say I has been using VRS to make a call and the interpreter comes in - sometimes they had a hard time understanding me because I used a signed word for one certain word and an interpreter wouldn't know what I mean. That's what I am told that Mountain Times regional call centers would handle Midwest calls - conflict of regional languages.
