

I want have some comments about VRS. I have watch NAD video by Andrew Phillips . Everythings what FCC offers are good but few things strongly disagreed, it is about in Part 3. Change from a Per-Minute to a Per-User Reimbursement System. I suggested to keep same system as using Per-Minute. I DO NOT ACCEPT to use ONLY ONE VRS provider. Few reason why I said, I am ZVRS, P3, and Sprint internet relay service cusomters. ZVRS and P3 are using both VRS and VP. ZVRS is normally using at home as I have VP equipment to use. P3 is on my laptop to using to travel as out of town also using in home as well. Why I have two, ZVRS and P3, so we have backup in of urgent or emergency calls on either VP machine or my laptop fo SAFETY. Just in case if ZVRS or P3 not ready so I can log in the P3 or ZVRS. Think about same thing to hearing people, they have cell phone and home phone service. Also you see I have Sprint internet relay service, I am using it at my work when I need call using on the internet because can't using videophone due to internet limited at work. Now I have tell you, FCC. Please keep free choice for all deaf cusomters to using any of VRS providers of their choice just like which I already have registered with those three VRS providers. IT IS VERY IMPORTANT AND SUPPORT MY COMMENTS ABOUT USING VRS PROVIDERS.

Thanks.
