

Regarding Proceeding number 11-109

Please do NOT allow LightSquared to interfere with the GPS system by proceeding with their cellular broadband service. Studies have proven that the interference caused by the service has no known remedy. I use GPS as a boater to insure my safe travels at night and in inclement weather. I also use GPS as a truck driver to facilitate accurate and prompt deliveries of the products I haul. Disruption of accurate GPS services would definitely be an unnecessary burden on my safety and occupation.
