

I urge FCC to approve hearing people can get phone number from Neustar registration, not from relay providers to use point to point call to deaf people. Hearing parents only has authorize to register phone number for deaf children under 18 age to use a relay service. Also hearing employers of schools, governments, medicals, religions, and businesses only has authorize to register phone number for deaf employees to use relay service for business purpose. It is effective communication by Americans with Disabilities Act and Rehabilitation Act.
