

I writing in opposition to the Light Squared Wireless System. I'm a license charterboat captain and the use of the GPS is an absolute tool in saving lives when a tragedy strikes. When in need of assistance GPS coordinates are relayed via radios to notify help. Minutes can be the difference between living and dying. GPS also saves boaters time and fuel consumption. Also many of us rely on our in car GPS for navigation. Wireless Communication is important but not at the cost of american lives. Please do not approve this if it interferes with GPS
