

I, and most Americans, if they understood liberty, are against any measures by government authorities, be they federal, state or, local that grant permission to disrupt our ability to communicate freely. There is no threat that you think this will protect us from that is as damaging as allowing the government to cut off free communications between citizens. That you are even considering this violation of our 1st Amendment rights brings your judgement into question. The only entity such abrogations of our freedoms will protect is the government. This will in no way protect individual citizens. I strongly oppose this proposal in its entirety.
