

To whom it may concern,

Everyone I know has and uses a GPS in their cars and Boats. GPS has been a reliable way to get you from point A to Point B whether by Car, Boat or Plane.

Boaters rely on their GPS to get them safely to where they are going and back and is heavily depended on for safe navigation.

Wireless broadband service is important, but it should not come at the expense of GPS.

All the studies show that LightSquared?s proposed network would cause interference and that there are no remedies.

We rely on the FCC to protect the integrity of the GPS signal and I support their recommendation to stop LightSquared?s current proposal.

Thank you,

Kent Zessin
