

I live in a rural area where we are seriously underserved with broadband service let alone competitive service. This marginalizes US CITIZENS!!! Some so-called third-world countries have better wireless service than many people in the good ol' US or A. In the richest country on the planet this should not be the case--in fact ALL citizens of the planet should have equal access!!!

Here's some additional commentary and info:

I want more competition in cellular service that will help reduce prices, and LightSquared will bring new competition to big cellular companies with high prices.

I want better coverage and service reliability, especially in rural America, and LightSquared will provide it.

I want more cellular capacity so that more calls can go through in an emergency, and LightSquared will deliver extra, desperately-needed infrastructure.

I want LightSquared to have a fair chance to bring their offerings to underserved and overpriced cellular service.
