

We need more competition in the cell phone market.

We need to stop giving Utilities such as Electric, Cell, land phone, internet providers, and Satellite internet, and others a guaranteed profit. Let them be on free market, so they can compete, and maybe the best competitor will win.

NV Energy CEO made 8 million and their employees all received a raise. While working people starve and live on the street. Large cell phone companies all pull the same BS. And overcharge for their service, and hidden charges.
