

On behalf of the Colorado Emergency Management Association located in Centennial, CO, I am requesting that the FCC reconsider the statement in CFR 47 ?11.56(a)(2) regarding exceptions to the ECIG Guidelines and delete the reference to ?using text-to-speech technology.? This will not explicitly endorse or mandate the use of text-to-speech technology, but allow the use of the technology to be a decision driven by the marketplace.

Thank you for this opportunity to submit these comments.

James A Lancy, President
Colorado Emergency Management Association
