

I think it's time that the FCC start paying attention to what they're supposed to be doing and to STOP playing favorites to big business and old friends. You're supposed to be working for the people, ALL the people. It's past time that you started doing that.

I want more competition in cellular service that will help reduce prices, and LightSquared will bring new competition to big cellular companies with high prices.

I want better coverage and service reliability, especially in rural America, and LightSquared will provide it.

I want more cellular capacity so that more calls can go through in an emergency, and LightSquared will deliver extra, desperately-needed infrastructure.

I want LightSquared to have a fair chance to bring their offerings to underserved and overpriced cellular service.
