

DA 12-474

Released: March 26, 2012

Is your inquiry going to cover

- communications interoperability or
- information system interoperability?

The scope makes a great deal of difference. If you intend to include information system interoperability then you must treat

- doctrinal
- cognitive
- procedural
- process
- data

aspects of interoperability in addition to

- communications interoperability.

There are myriad definitions (and non-defined sloppy uses) of the term 'interoperability'. Which do you intend to use?
