

Gentlemen,

I am filing this request in support of your consideration for the addition of more LPFM radio station. Community radio has suffered greatly over the past couple of decades due to large corporations moving local stations to larger cities and leaving most small markets without an FM signal. With the addition of LPFM service, many small communities will have the opportunity to receive local information again. In the 37821 zip code, there are no LPFM signals and I would be interested in putting one on the air if your committee approves the expansion of other LPFM station in the near future.
