

Appendix D
Pilot Projects Using Funding For Construction
Page 1 of 1

Pilot Project	Description
Iowa Rural Health Telecommunications Program	This is a partial construction project. Some of the health care providers (HCPs) in the network required last mile fiber to their facilities, which the Pilot Project constructed. Services to other HCPs in the network are leased from vendors.
Illinois Rural HealthNet Consortium	This is a partial construction project. The network is a combination of wireless facilities, last mile connections that the participating HCP will own and leased services.
Rural Nebraska Healthcare Network	This Pilot Project is one of the two projects that is entirely new construction.
Health Information Exchange of Montana	This project is a partial construction project. A portion of the network will be constructed and owned by the network. Other services are provided through leased facilities.
Northeast Ohio Regional Health Information Organization	This Pilot Project is one of the two projects that is entirely new construction.
Michigan Public Health Institute	This is a partial construction project consisting of a wireless network for a small number of health care providers in a remote part of Michigan. Other services are provided through leased facilities.
St. Joseph's Hospital	This is a partial construction project consisting of last mile fiber connections owned by the HCPs. Other services are provided through leased facilities.
West Virginia Telehealth Alliance	This is a partial construction project involving construction of a fiber ring. Other services are provided through leased facilities.
