

I want more competition in cellular service that will help reduce prices, and LightSquared will bring new competition to big cellular companies with high prices.

I want better coverage and service reliability, especially in rural America, and LightSquared will provide it.

I want more cellular capacity so that more calls can go through in an emergency, and LightSquared will deliver extra, desperately-needed infrastructure.

I want LightSquared to have a fair chance to bring their offerings to underserved and overpriced cellular service.

I'm really pulling for Light Squared and believe they could add value to the limited broadband offerings in the US. I urge the FCC to swap LS' existing spectrum for usable bandwidth & reinstate approval for their plan to offer wholesale chunks of bandwidth to Sprint & it's other partners.
