

Dear Federal communications Commission,

We would be very pleased to hear the FCC upgrades the status of the LPFM stations to operate at a full 250 watts. I support the FCC's proposed 250 watts so I can listen to the local LPFM station within my home.

Please incorporate all of your recent considerations, pro-LPFM, from Public Notice released 031912. We enjoy our local LPFM station and support them. I am behind everything good for LPFM radio and oppose anything that does not help LPFM broadcasters.

I am asking the FCC to allow LPFM stations to improve their power to 250 watts specifically, and improve all FCC rules to make the most of LPFM stations. I believe LPFM is the better "sound" of all the stations in our local area.

Respectfully,

Lowell Jackson
